

CLASSIC DURA™ BACKING ROD

Product:

Classic Dura™ Backing Rod is manufactured from extruded polyethylene foam, Available in Rod with different diameters.

Product Features:

Standard Backer Rod is an ideal non-absorbent compressible backup material inserted into a joint to control sealant depth. It creates a backstop to allow proper sealant tooling and allows proper sealant of the joint surfaces. Backer Rod forms a proper bond between the back-up material and the sealant. It can also be used as a temporary joint seal.

- Commonly used for glazing operations, window and door applications, expansion joints, curtain wall joints, partitions, log construction or pavement joints.
- Standard Backer Rod is an extruded round, closed cell, low density poly ethylene foam material with a skin-like outer texture. It is highly flexible and compressible for easy installation.
- This material compatible with butyl, poly sulfide, acrylic, Polyurethane, Silicone and most other cold sealants.

Technical Data:

PRODUCT TECHNICAL DATA-Physical Properties

Property	Test Method	Value
Density Typical	ASTM D1622	1.5 lbs/cu.ft.
Compression		
Deflection	ASTM D1621	4 psi@25%
Water Absorption	ASTM C5090	.02%byvol.
Temperature Range		-90°F to 200 °F
R-Value	ASTM C335	2.2

Composition : Closed-cell polyethylene foam ASTM C 1330

Sizes Available: 6, 10, 15, 20, 25, 30, 50 & 75 mm
